Matrix Metals Launches North American Headquarters in Stafford, Texas

STAFFORD, TX – Matrix Metals LLC announces the opening of its new North American headquarters in Stafford, Texas with an inaugural event at the new location: Stafford Grove Industrial Park, Suite 100, 10643 West Airport Boulevard.

“We are very excited to launch our North American headquarters today at Stafford, a prominent business location in the state of Texas. We are committed to rapid growth of our business in North America and believe that this move to Stafford and the new facility provides us with a platform to better service our customers with superior supply chain solutions. The new facility also provides a better work environment for our people,” **said Richard Morford, President of Matrix Metals.**

Matrix Metals designs, produces and markets steel castings on a global basis, with manufacturing facilities in North America and in India. It produces products for the valve, construction and mining, automotive, marine, transportation, energy and military sectors.

Matrix Metals has a large capacity of 32,000 tons per annum of steel castings. In addition, it has its own machining facilities plus works with third party machine shops to produce complete machined solutions for its demanding and diverse customers.

“Stafford offers the perfect location for Matrix Metals’ new North American headquarters. The area offers a developing commercial environment that is supportive of industries, which are similar to our clients and potential clients. Further, Stafford is close to our employee base, and the city offers amenities that will assist in continued success,” **Anthony Quinto, chief financial officer of Matrix Metals.**

Matrix Metals belongs to the Sanmar Group, a diverse \$1 billion, fourth-generation family-owned and professionally managed group with its global headquarters in Chennai, India, and businesses in the chemicals, engineering and shipping sectors. The group has a trans-continental presence with facilities in India, Egypt and North America and employs more than 5,000 people.
